

The Learning Partner I Need

I need a Learning Partner who knows what I can do;

A Learning Partner who cares more about what I want to do

Than what she wants me to do

A Learning Partner that knows what my troubles are

Even when I cannot tell her

Who will help me help myself

A Learning Partner who will let me waste material, waste time, throw away ideas and try new!

A Learning Partner who will let me experiment with life around me, and learn it on my own terms

Who will allow me to learn my own way of doing things – build my own skills – find my own way

But who will guide me, advise me

And in whom I can trust

Who will be there before me

When I need her most
