

Make a Tin-Can Telephone

- Take two empty tin-cans and a long piece of string.
- Carefully punch a hole in the bottom of each tin-can by gently hammering a nail through their bases.
- Pass one end of the string through the hole of one of the tin-cans.
- Tie a large knot on the end of the string on the inside of the tin-can so the string cannot be pulled out.
- Repeat with the other tin-can at the other end of the string.
- Have a friend take one of the tin-cans and then move away from you so that the string pulls taut.
- Take it in turns to speak into the open end of one tin-can while the other person holds her tin-can to her ear to listen.

Materials

- ❖ 2 empty tin-cans
- ❖ A long piece of string
- ❖ Nail
- ❖ Hammer
